RITA RIBAUDO

JUNIOR DEVELOPER

Web, desktop and game development

Junior developer with an artistic background. I combine visual sensitivity and logical thinking to turn ideas into functional applications and interfaces. I am passionate about programming, problem solving and creating thoughtful user experiences.

PERSONAL PROJECTS

Loveball

C++ / SFML

Arcade game featuring ball and paddle movement, collisions, geometric obstacles, lives management, and win and game-over conditions.

ChillRoom Web

Python / Flask / JavaScript / PostgreSQL

Platform with authentication, real-time chat, idea sharing and a games area. Development of the backend, database and web interface.

ChillRoom Desktop

C++ / Qt Widgets / CMake / WebSocket

Desktop application with native interfaces and connections to the web service for messaging and user presence.

EDUCATION & TRAINING

Programming · self-directed and mentored learning

Self-directed study and hands-on practice through personal projects, with individual mentoring from a professional software developer working at a specialist company. This learning path combines theoretical study, technical discussions and the practical application of skills to projects.
